

RAPID PRO DTF

DESKTOP

We are proud to introduce the latest desktop DTF for those interested in starting a DTF business from home or from a small commercial space. This desktop has been produced with all the same features of a full production DTF printer, including Honson board, Espon i1600 print heads, white ink circulation with staggering print speeds of up to 40 large prints per hour.

The Rapid Pro can be setup in various configurations, from a compact desktop option or complete with a stand with various powder machine options. The speed and print quality is truly amazing and also comes with a high end Rip program that will save you time and money.

Before you consider a converted DTF machine you simply must check this out first!
